

New voting about Mail Inspector's future!

Contributed by Marc

As we think about some new ways and benefits of Mail Inspector we are highly interest in our users opinion. So please make your vote at the left hand side survey as this will have a direct influence in the future development of Mail Inspector.

There are some thoughts in Frederiks and my mind about what Mail Inspector could be used to in the far future as the new class framework Mail Inspetor 4 will be based on is really powerfull. But we are not sure what the users (you folks) needs are and whether you are interested in changing / extending the focus of Mail Inspector. To bring some more light in what you folks like to have we started a new survey. Please be so kind and take a sec to place your vote (at the left hand side).

Thanks and cheers,

Marc
